PRODUCT-TRAINING

PT 275 | SILworX® - HIMatrix®
Communication basics

TrainingFacts

HIMatrix systems speak many languages

Upon successful completion of the seminar, participants will be able to independently engineer and operate the communication between HIMatrix systems and between HIMatrix systems and third-party systems. They will be familiar with both the implementation of the safety requirements during modifications as well as the principle procedures for dealing with faults.

Course Content

Hardware
- Bus concepts
- safeethernet
- Modbus TCP/IP
- Connectivity and requirements

Software
- Configurations in SILworX®
- Variable declarations
- Possibilities for diagnosis during operation
- Procedures in the event of faults
- Documentation
- First start-up

Duration:
1 day, beginning Friday 08:30   ending 15:00
Number of participants: minimum 4, maximum 10
