

New operating system software for HIQuad X F-IOP 01 module is available.

With the new operating system V11.0 for the F-IOP 01 module the safety-related restrictions have been rectified.

Product	OS	
F-IOP 01	V11.0	HQX_IOP0x_HA1_OS_V11.0.ldb

The operating systems are herewith officially released and can be delivered. HIQuad X module production will change to the latest versions as soon as possible. Until then the user or our support can update modules.

In general HIMA recommends to update to the newest version available.

For detailed description please see the HIQuad X Release Notes:
